

CDD15ELS

ELECTRIC LIFT

The CDD15ELS electric lift is an exceptional device that combines the highest quality, durability, and modern technological solutions. Designed with efficiency in mind, this lift offers an impressive load capacity of 1500 kg, making it the perfect tool for transporting and lifting heavy loads in warehouses, production halls, or during construction work.

At the heart of this lift is a powerful electric drive that ensures reliable performance and efficiency. The 0.75 KW drive motor and the 2.2 KW lifting motor not only guarantee fast and smooth lifting but also long-term and trouble-free operation. Thanks to high-quality components, the lift offers stable and reliable performance, eliminating the risk of failure. The lift can raise loads to a height of 3 meters thanks to its precisely designed lifting system. The travel speed of 4.2 – 4.5 km/h and lifting speed of 90 mm/s guarantee efficiency, which is invaluable in dynamic working.

■ Specification

Model	CDD15 ELS - 1.5T
Load capacity	1500 kg
Lifting height	3 m
Weight with battery	720 kg
Battery	2x12 V / 120Ah
Drive motor	0.75 KW
Lifting motor	2.2 KW
Drive wheel size	210x70mm
Wheel material	PU

■ Working range

Travel speed	4.2 - 4.5 km/h
Lifting speed with load	90 mm/s

■ Dimensions

Overall length	1890 mm
Width	808 mm
Fork length	1150 mm
Turning radius	1455 mm
Ground clearance under the mast	26 mm
