

2.5T 4.5M

INTERNAL COMBUSTION FORKLIFT

Thanks to its Duplex mast, the H25 2.5T 3M forklift offers a lifting height of up to 300 cm, providing comfortable working conditions for loading and unloading tasks. This allows for easy handling of pallets and goods at medium heights, making it an ideal choice for warehouses and facilities with medium-height shelving.

The forklift is powered by the XINCHAI 3E22YG51 engine, which delivers 44.8 kW at 2400 rpm, ensuring excellent performance and fuel efficiency. With three cylinders and a torque of 210 Nm at 1600–1800 rpm, the engine provides high power, enabling work with heavy loads and on various surfaces. The H25 2.5T 3M model features a speed of up to 17 km/h without load and 19 km/h when fully loaded. With a load speed of 450 mm/s (1st gear) and 550 mm/s (2nd gear), the forklift can quickly and efficiently transport goods. The traction force of 21 kN (without load) and 15.2 kN (with load) allows for precise and safe maneuvering.
