3.5TON 3M 4X4

INTERNAL COMBUSTION FORKLIFT

Our diesel-powered off-road forklifts with 4x4 drive are the perfect solution for companies that need reliable equipment for work in challenging terrain conditions. With the latest technology, these forklifts provide maximum efficiency and user comfort. Our forklift is equipped with a high-quality engine that ensures maximum performance and reliability. This means you can count on its dependable operation even in the most demanding terrain conditions.

Only the best materials were used in the construction of this forklift, guaranteeing its durability and resistance to damage. This is an investment that will bring long-term benefits to your company. Thanks to advanced technology, our forklift is extremely economical to operate. It consumes less fuel, which translates into lower operating costs and greater savings for your business. One of the key features of this model is the 4x4 drive, which ensures excellent traction and stability on all types of surfaces.
