

# GG2500T

## TELESCOPIC LOADER

Equipped with a Kunming Yunney Power Euro 5 engine with 75 HP, this machine offers excellent performance while complying with stringent environmental standards. It is a machine designed for professionals who need a reliable tool for work in various conditions.

Weighing 5500 kg, the GG2500T is a stable machine that easily handles heavy loads. With a rated load capacity of 2500 kg, it offers immense lifting capacity, allowing the transport and handling of materials of various weights and sizes. The GG2500T loader provides a maximum lifting height of 4500 mm, ensuring excellent flexibility when working at great heights. With a bucket capacity of 1.0 m<sup>3</sup>, the GG2500T is an excellent choice for intensive loading and material handling tasks, the maximum lifting weight with the closed boom is 2500 kg, and with the extended boom 800 to 1000 kg.

### ■ Specification

Machine Weight	5500 kg
Engine Power	75 KM
Rated Load	2500 kg
Hydraulic Pressure	16Mpa
Standard Tire	16/70-20
Engine	Kunming Yunney Power Euro 5
Lifting Height	4500 mm
Rated Speed	2400 r/min
Hydraulic Oil Flow	90l/min

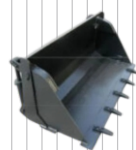

### ■ Work Range

Bucket Capacity (cbm)	1.0
Max Lifting Weight with Extended Boom	800-1000 kg
Wheelbase	1550 mm
Discharge Clearance	2850 mm
Max Lifting Weight with Closed Boom	2500 kg
Max Speed	20 km/h
Track	2550 mm
Bucket Capacity During Max Lifting	800 - 1000 kg

### ■ Main Dimensions

Length	6270 mm
Height	2670 mm
Width	2100 mm

### ■ Additional equipment (for reference)

4-in-1 Bucket

Grapple (Crocodile-type)

Pallet Forks

Grass Grab

Bale Grab

Snow Plow

Mower

Sweeper

Wood Grab
